

Aidan Ash

Pittsburgh, PA | 724-771-0069 | aash3@hawk.illinoistech.edu | www.linkedin.com/in/aidan-ash/ | github.com/Aidan2426

EDUCATION

Illinois Institute of Technology

Expected Graduation: May 2027

Master of Applied Science in Data Science

Chicago, Illinois

Bachelor of Science in Computer Science

Cumulative GPA: 3.5 / 4.0

- Coursework: Data Structures and Algorithms, Big Data Technologies, Advanced Database Organization, Software Engineering I, Introduction to Algorithms, Operating Systems

EXPERIENCE

ServiceNow Developer Intern

May 2026 – Present

Arconic

Pittsburgh, Pennsylvania

- Developed ServiceNow Workflow Studio flows using Integration Hub's AD spoke combined with JavaScript and PowerShell to automate lifecycle management of 40,000+ Active Directory accounts, saving 40 hours per week of manual processing from IT staff
- Built a Platform Analytics dashboard with 5 custom reports tracking disabled, deleted, and at-risk accounts presenting 1,000+ RITMS
- Conducted quality assurance testing on workflows developed by 2 engineers, identifying 3 critical bugs and 40+ UI inconsistencies prior to production release
- Designed automated weekly email notification flow for 100+ users prior to associated account deletion, helping administrative cleanup across 10,000 employees
- Implemented fault-tolerance exception handling across 10+ workflows, automatically generating ITSM incidents with HTTPS RITM references upon failure preventing undetected breakages across 25+ daily executions

Information Technology Intern

May 2025 - August 2025

Norwin School District

Pittsburgh, Pennsylvania

- Helped manage 5000+ district devices using JAMF, ASM, Excel, and Sherpadesk
- Inventoried 2000 ipads for resale, generating \$100k + in revenue
- Installed and configured wireless access points and punched in Cat6 cable into IDF
- Ran 2000+ ft of ethernet and maintained network hardware across 7 buildings district wide
- Planned a network configuration for a building, complete with physical hardware and security, as well as server configuration for DNS, DHCP, Office 365, and Access Control

PROJECTS

Brawl Pick - Python, scikit-learn, Streamlit

March 2026 - April 2026

- Trained a Random Forest classifier on 3,750+ ranked matches, achieving 60% win prediction accuracy
- Collected match data via Brawl Stars API to build a labeled training dataset
- Built a streamlit app using Monte Carlo simulation to recommend draft picks in real time

Real Estate Management Application - PostgreSQL, pgAdmin, Java

January 2025 - May 2025

- Built a database-drive application with user registration, property search, and booking features
- Designed relational scheme and implemented backend logical with Java + PostgreSQL
- Supposed role-access and optimized queries with indexing

SKILLS

Languages: Javascript, Python, SQL, Java, Powershell, Html, CSS, C, Assembly

Tools: ServiceNow, Jamf, Intune, Apple School Manager, Sherpadesk, git, Jupyter Notebook, Ubuntu

Platforms: Windows, Active Directory, MacOS
